

Office Memorandum • UNITED STATES GOVERNMENT

TO : Chief, Document Division, OCR

DATE: 17 February 1959

FROM : Chief, Medicine Division, SI

SUBJECT: Illegibility of document describing Medical Mission Survey Tour

REFERENCE: 3, 112,265 distributed 30 January 1959

25X1

1. We are returning the attached documents as they have placed us in a dilemma. Although presumably qualified in the field of medicine, those of us who have tried to decipher these documents have not been able to ascertain whether (a) this represents a new language form, (b) a poor copy, or (c) the dire possibility that we are going blind.

2. In a more serious vein, we would appreciate it if you would be good enough to duplicate these reports. They contain a wealth of material which could be utilized in contributions to the NIS, Section 45.

3. In cases where reports are quite clearly useful only to a limited number of consumers it might be wiser to forward the original on a loan basis. Any suggestions that you may have to improve the recurring problem would be appreciated.

Astigmatically yours,

25X1

I talked to this date & explained to him our long & continuing battle to obtain better copy; that the originals involved in his case were poor thermoprints to begin with - I agreed to send the "Poor Thermos" & the photostats to him for review - he will return the original

~~CONFIDENTIAL~~
